

**ABLOY®** DOOR HANDLES  
ARCHITECTURAL DESIGN

## SURFACE FINISHES

When you're selecting a surface finish and material for a handle, we recommend taking into account not only the overall appearance of the space, but also the operating conditions of the handle and the amount of wear it has to withstand.

### OUR RANGE INCLUDES

- Brass handles which we recommend for use in exterior doors in residential buildings, in public spaces and high traffic doors.
- Stainless steel handles which are suitable for use in both exterior and interior doors in residential buildings, for example.
- Aluminium handles for interior doors in public spaces.
- Zinc handles which are suitable for light interior doors.

To make it easier to find handles in the range, we have created a quick selection table which you can use to check the features available with your favourite handle.

# Ideas and innovations - FINNISH DESIGN

Design means the appearance, feel, ease of use and, above all, functionality of a product. It involves an understanding of needs, innovation and the very best traditions. We want to make everyday life smoother and more secure for you.

The ABLOY DOOR HANDLES bring a whole host of styles to your living environment: modern, traditional, youthful – whatever you desire. Small details add the finishing touches to an overall harmonious look. Abloy's range includes handle models designed by its own in-house design department as well as handles by top Finnish designers, such as Alvar Aalto, Harri Koskinen and Timo Sarpaneva.

Anodized aluminium (Aho)

# ABLOY® EXTERIOR AND INTERIOR DOOR HANDLES

Did you know that..

ABLOY handles can be installed anywhere, regardless of door thickness?

## ABLOY® DOMUS 12

Design  
Harri Koskinen

The inside handle is an ABLOY POLAR handle or alternatively any other handle you'd like.

## ABLOY® DUETTO 8

Design  
Janne Loiske

This traditional and stylish DUETTO handle is a combination of classic and distinctive design. The handle is equipped with color panel which can withstand sub-zero temperatures and UV radiation. Panel color options: brown, red, green, blue, light and dark grey.

Our range of exterior and interior door handles includes products suited to both classic and modern design. Strong return springs facilitate the opening and closing of the door and help to keep the handle in the correct position.

## ABLOY® ONCUT 5

Design  
Pasi Pänkäläinen

This extremely discreet and elegant handle is a pleasure to look at and use. The handle is suitable for use in public and residential buildings.

## ABLOY® FORUM 4

Minimalist, elegant handle is a high-quality and durable solution for new and renovated spaces

## ABLOY® HALTI

Interior door handles are smaller and more delicate handles than their exterior counterparts, and are designed specifically for interior use.

These door handles are made of zinc, which is especially suitable for indoor use. Our wide range of interior door handles also includes handles made from other materials, making for a versatile range of design solutions.

! Select handles for both sides or simply an inside handle. The espagnolette handle is available in zinc or brass.

These special handles have been designed for doors and windows with an embedded espagnolette that closes the upper and lower part of the door or window. These espagnolettes are typically used in balcony, garden or backyard doors. Since the handles are bent to the side, there is sufficient elbow space for doors which open outwards.

## CONVENIENT EXIT SOLUTION

Panic bar solution keeps the door closed and locked from the outside but allow for hands-free, convenient exit from the inside. ABLOY PANIC BARS are tested clearly above requirements of the EN 1125 standard.

Panic bars can be used with either single or double door solutions and with mechanical or electromechanical lock cases.

! The panic bar rail surface finish is stainless steel and the rail's standard length is 1150mm. Panic bars are available in ABLOY COLORS with ACTIVE-coating!

## EXIT SOLUTION FOR SCANDINAVIAN RANGE

PBE001 for wooden, metal or narrow stile doors. The outside lever handle must be selected separately. PBE002 for wooden and metal doors. Includes an external anti-burglar plate. PBE003 for narrow stile doors. Includes an external anti-burglar plate. The panic bar rail surface finish is Rt satin, and the rail's standard length is 1150 mm. Surface finishes: Chrome, satin, and brushed nickel
